THE MINISTER OF DEFENCE (SHRI PRANAB MUKHERJEE): (a) to (c) There are differences of perception on the alignment of boundary between India and Nepal in some regions including the major difference in Narsahi and Susta regions in the West Champaran. In Susta region, shifting of course of Gandak river, the mid-stream of which formed the boundary as per Treaty of Sugauli, has resulted in claims and counterclaims by both sides. Preliminary survey of the area by Government indicates that some encroachment has been reported so far in case of adjacent area of Uttar Pradesh.

India and Nepal have established a Joint Technical Committee (JTC), with the objective of *interalia* resolving the differences of perception on the alignment of boundary in various segments. The JTC is yet to complete its mandated tasks. Government has reiterated from time to time to His Majesty's Government of Nepal the need for an early resolution of the differences of perception and the need for maintaining status quo in these regions pending resolution of differences of perception. Sashastra Seema Bal (SSB) has been deployed along the Indo-Nepal border and it has instructions to ensure that there are no encroachments on the Indian territory.
